- 1. The Maximum User Payload includes:
- a. the conventional load (this is the allowance for passengers)
- b. essential habitation equipment (items and fluids required for safe and proper functioning of habitation equipment)
- c. optional equipment (items available from the manufacturer over and above the standard specification)
- d. personal effects (those items not covered by the above)
- 2. The Mass in Running Order is the mass of the unladen vehicle including a 75kg allowance for the driver plus engine coolants and 90% of the fuel tank capacity and 1 x 6kg Calor Lite LPG cylinder.
- 3. The MRO is calculated with the fresh water tank empty. If you travel with water in the fresh water tank then the payload will reduce accordingly.
- 4. Please take care to ensure that you have allowed for the masses of all items you intend to carry in the motorhome, e.g. passengers, optional equipment, essential habitation equipment and personal effects, such as clothing, food, pets, bicycles, sailboards, sports equipment etc.
- 5. Warning under no circumstances should the maximum technical permissible laden mass of the motorhome be exceeded.
- 6. Caution When fitting a tow bar, it must meet certain minimum requirements as specified by Type Approval Regulations. The bar will have marked on it the approval standard (94/20/EC or 55R ECE) and the maximum download, or nose weight, that it can accept. It must fit the manufacturer's approved mounting points and must not obscure the towing vehicle's number plate.
- 7. Note the additional weight of the tow bar and trailer nose weight increases the rear axle loading of the motorhome so care should be taken that the rear axle load is not exceeded when towing.
- # The maximum trailer weight is limited by the gross train weight which must not be exceeded. For example if the vehicle is at the maximum MTPLM of 4500kg, then the maximum trailer weight possible is 1500kg. Reducing the weight of the vehicle by removing payload, will allow you to increase the trailer weight up to a maximum of 2000kg.
